

What are the default pages in the account area?

Class	Route	Description
<code>AccountLoginPage</code>	<code>login</code>	A page where users can log in.
<code>AccountRegisterPage</code>	<code>register</code>	A page where guests can register.
<code>AccountPasswordForgotPage</code>	<code>password.forgot</code>	A page where users can send a password reset email to their email.
<code>AccountPasswordResetPage</code>	<code>password.reset</code>	A page where users can reset their password.
<code>AccountOrdersPage</code>	<code>account.orders</code>	A page that lists all of a user's orders and lets them filter/search.
<code>AccountOrderViewPage</code>	<code>account.view-order</code>	A page that shows more information about an order.
<code>AccountAddressesPage</code>	<code>account.addresses</code>	A page that lists all of the users addresses.
<code>AccountAddressNewPage</code>	<code>account.new-address</code>	A page where users can create a new address,
<code>AccountAddressEditPage</code>	<code>account.edit-address</code>	A page where users can edit one of their addresses.
<code>AccountDetailsPage</code>	<code>account.details</code>	A page where users can update their account details and change their password.
<code>AccountInvoicePage</code>	<code>account.view-invoice</code>	A simple invoice for an order - currently not linked to from anywhere.
<code>AccountOverviewPage</code>	<code>account</code>	The first page a user sees after they log in - currently redirects to the orders page.

The above classes reside in the `Aero\AccountArea\Http\Responses` namespace.
