Create Price List Entry Endpoint

Structure

Price List Entry

Name	Type	Description	Required
`id`	int	The id for the entry	No
`for`	string	What the entry applies to (e.g., all_products, all_products_unless_reduced, product, variant, category, tag, manufacturer)	Yes
`target`	string	Identifier of the target (e.g., id corresponding to the `for` or model for product, or sku for variant or name for category/tag/manufacturer)	Conditional
`type`	string	Type of the price adjustment (e.g., fixed_price, fixed_price_decrease, fixed_price_increase, percentage_decrease, percentage_increase)	Yes
`price`	object	The Price object (not required when `type` is *percentage* based)	Conditional
`percentage`	float	The percentage of the price list entry (only required when `type` is *percentage* based)	Conditional

`for_price`	string	Which price the entry affects (e.g., sale_price, base_price, rrp, cost_price)	Yes

Price

Name	Type	Description	Required
`amount`	float	The price **including tax**, in whole units (e.g. pounds not pence)	Yes
`currency`	string	The currency for the price, e.g. GBP	Yes

Example Request

```
POST /api/price-lists/{id}/entries
```

```
{
    "for": "variant",
    "target": "sku",
    "type": "percentage_decrease",
    "percentage": 20,
    "for_price": "base_price"
}
```

Example Response

```
{
    "priceListEntry": {
        "id": 1
    }
}
```
