Additional Attribute

Name	Type	Description	Required
`key`	string	The key of the additional attribute	Yes
`value`	string	The value of the additional attribute	Yes

Example Request

```
PUT /api/locations/{id|name}
```

```
{
    "opening_hours": {
        "monday": {
            "times": [
                {
                    "start": "09:00",
                    "end": "12:30"
                },
                {
                    "start": "13:00",
                    "end": "17:00"
                }
            ]
        },
        "overrides": [
            {
                "date": "2025-12-26",
                "label": "Boxing Day",
                "times": []
            }
        ]
    },
}
```

Example Response

```
{
    "location": {
        "id": 1
    }
}
```
