

What is a collection?

Collections are dynamic groupings of products in your storefront. Unlike tags or categories that group based on fixed properties, Collections allow greater flexibility.

How to define Collections

You define Collections based on specific rules. Rules allow you to set the following criteria for your Collections:

- Include specified tags - Include specified manufacturers - Be within a given price range - Be within a given price status - Be published within a given timeframe

Collections are best explained through examples.

Collections example 1

Lets create a Collection called: **BOSS Sale**

For this, you would specify the following rules:

Rule	Criteria
Limit to price status	Reduced price items only
Limit to manufacturer	BOSS

You would enter these rules in Aero as shown below;

< Back **New Collection**

Name
BOSS Sale

Rules

Rule	Reduce
Limit to price status	Reduced price items only
Limit to manufacturers	BOSS

Collections example 2

As another example, you could create a Collection called: **Everything Pink Under £2000**

For this example, you would specify the following rules:

Rule	Criteria
Limit to tags	Colour: Pink
Limit to price range	0 : 2000

We will enter the rules in Aero as shown below;

Back

Everything Pink Under £2000

Name

Everything Pink Under £2000

Slug

/ everything-pink-under-2000
