What is a redirect?

Within Aero, Redirects allow you to divert traffic from on URLs to another. Aero, including standard redirect codes.

Among other things, this is useful for handling missing pages.

Redirect Codes

Aero allows you to assign the following standard HTTP redirect status codes.

Code	Purpose	Description
301	Moved Permanently	This and all future requests should be directed to the given URI
302	Found	Tells the client to look at (browse to) another URL
308	Permanent Redirect (RFC 7538)	The request and all future requests should be repeated using another URI

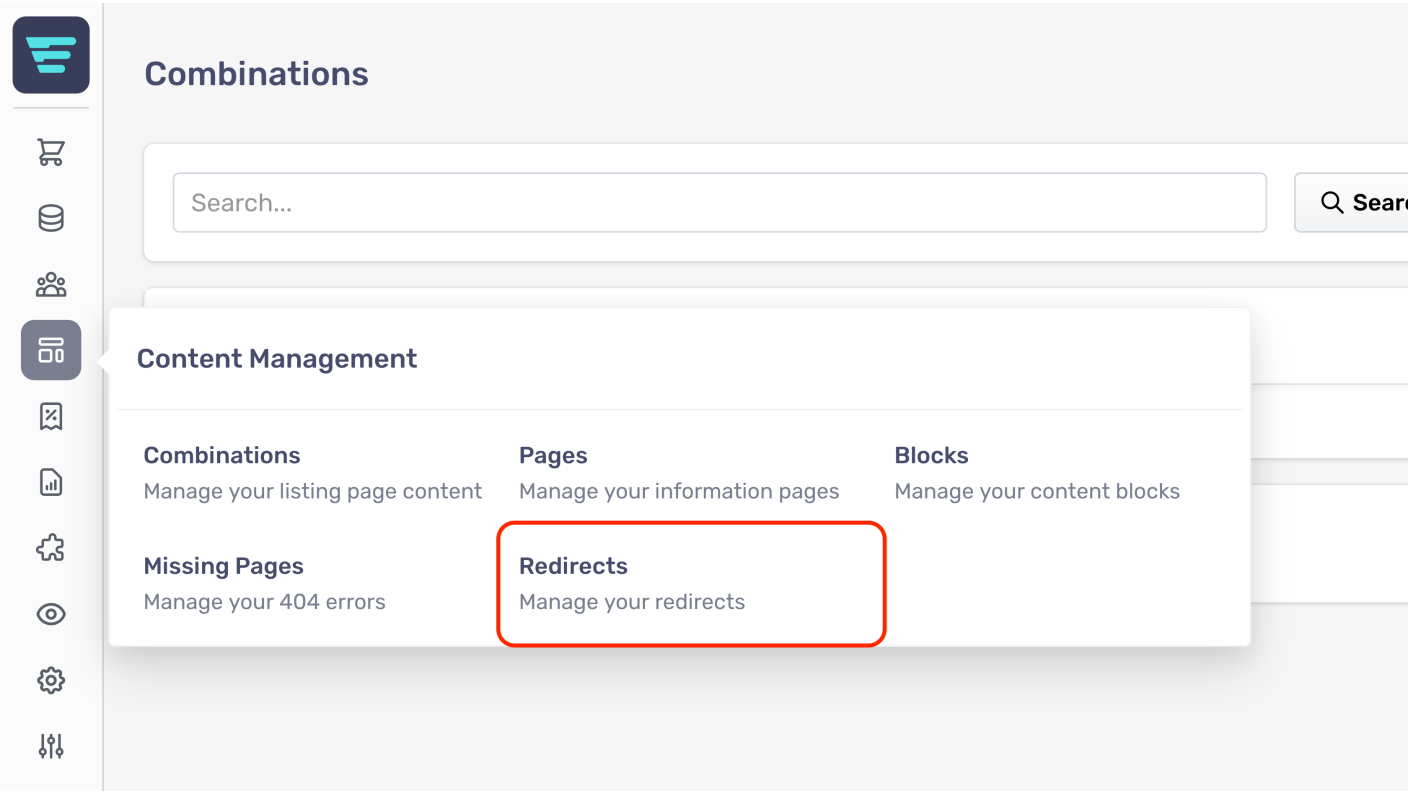

Where do I find my redirects?

Your Redirects are located in your Aero admin console.

- Step 1 - Click the Content Management button in the left hand menu

What is the redirects list?

Your redirtects list shows any redirects you currently have setup, along with their from and to urls and the status code.

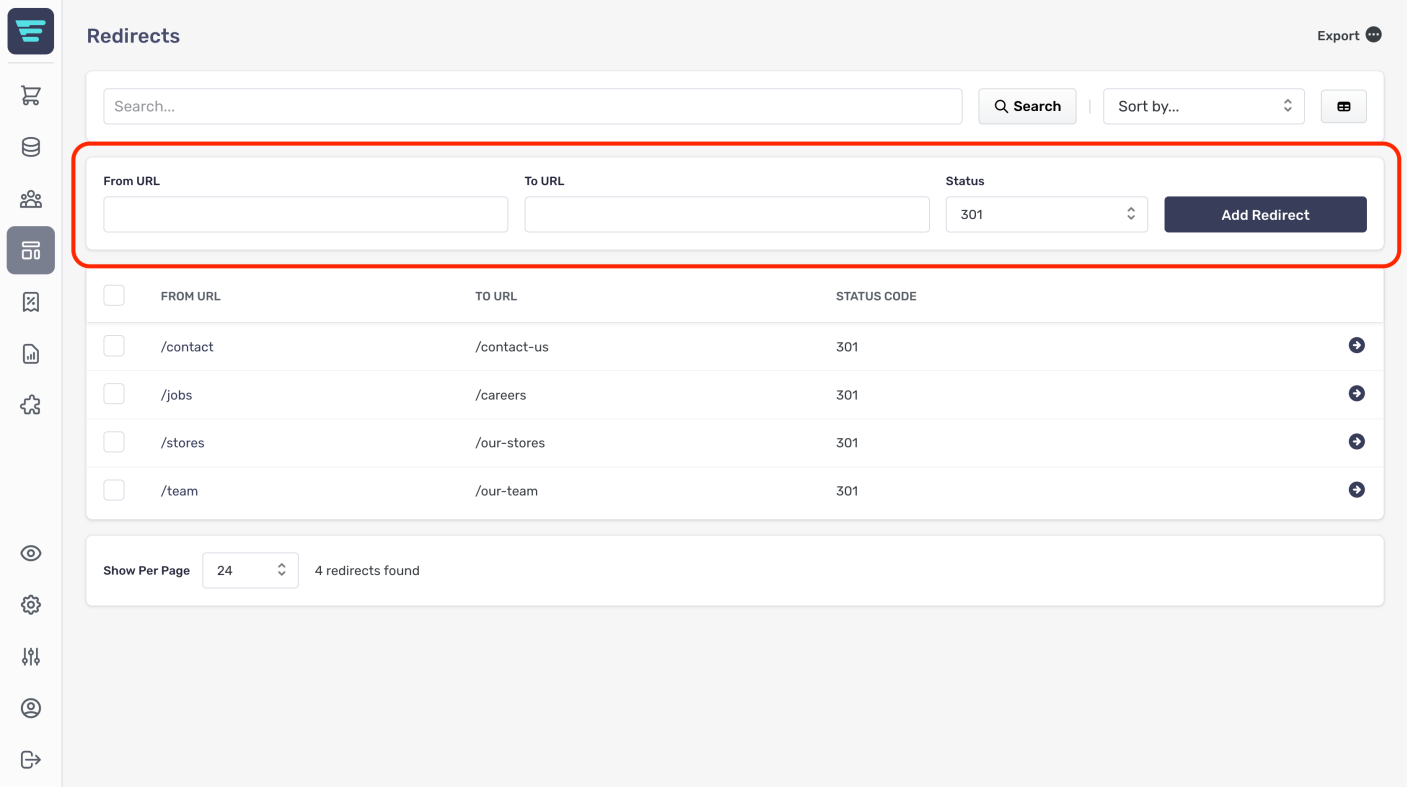

How do I create a new redirect?

Redirects are slighly different to how you create a new one, when compared with the other elements in the store.

Redirects require only a small amount of information therefor the create form is part of the listing page.

In order to create a new redirect first navigate to the redirect listing page. The new re-direct form is part of the listing page, being displayed between the search and the content.

Create redirect form

The form has only three fields to fill out;

- From URL - Enter the URL that you want to redirect traffic from - To URL - Enter the URL that you want to redirect traffic to - Status - Select the appropriate code;

- 301 - Moved Permanently - This and all future requests should be directed to the given URI
  302 - Found - Tells the client to look at (browse to) another URL
  308 - Permanent Redirect (RFC 7538) - The request and all future requests should be repeated using another URI
