

What are combinations?

Within Aero, Combinations allow you to change the way certain listings pages appear.

When filtered by specified criteria, your storefront will display distinct Combination pages. These pages will have a specific title, SEO and images.

Combination criteria

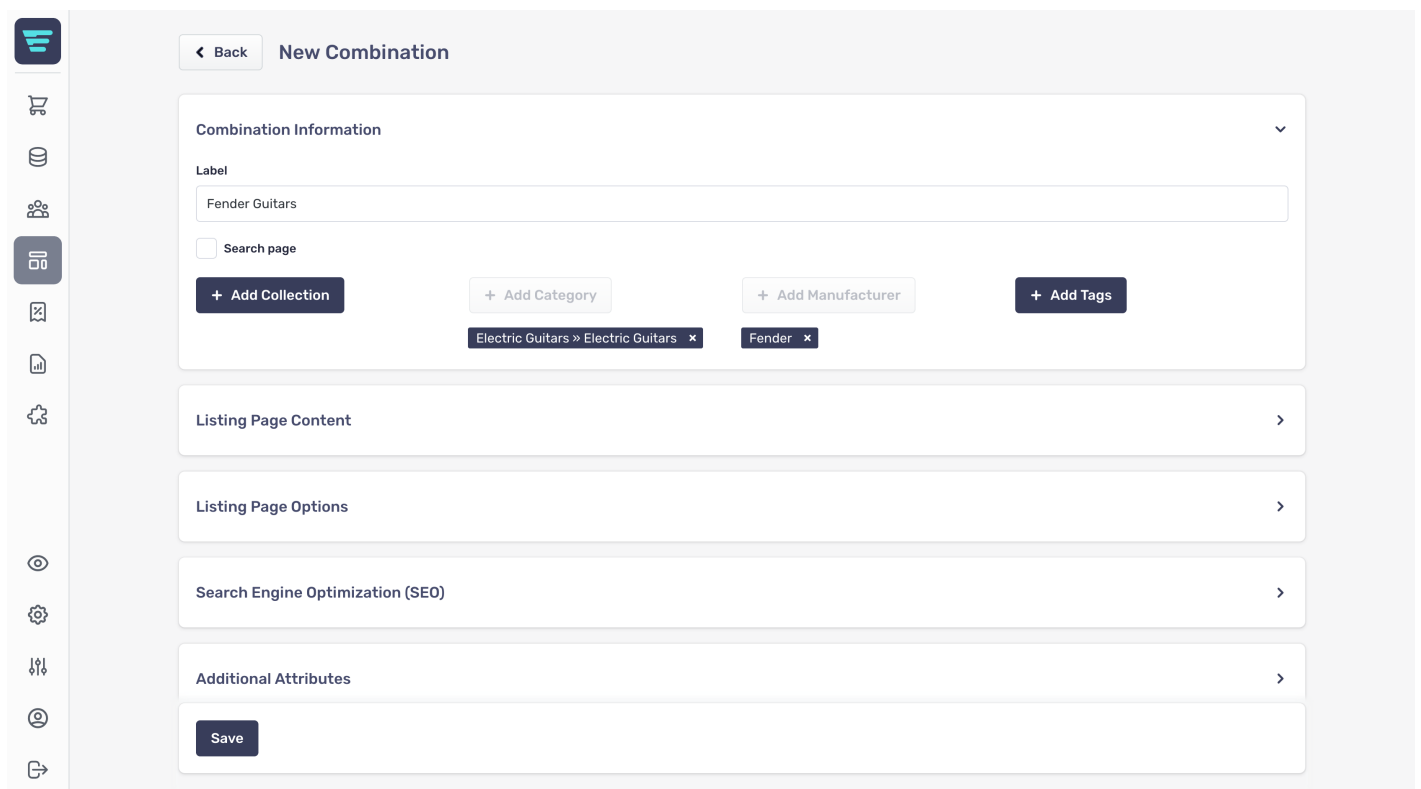

Combinations are made by combining a mix of the following criteria:

- Collections - Categories - Manufacturers - Tags

An example Combination

For example, you could combine the following if you wanted to create a specific listings page for **Fender Electric Guitars**:

- Category: Electric Guitars - Manufacturer: Fender

The screenshot shows the 'New Combination' form in the Aero interface. The form is titled 'New Combination' and has a 'Back' button. It contains several sections for defining the combination:

- Combination Information**: This section includes a 'Label' field with the text 'Fender Guitars'. Below the label is a 'Search page' checkbox. There are four buttons: '+ Add Collection', '+ Add Category', '+ Add Manufacturer', and '+ Add Tags'. Below these buttons, there are two selected items: 'Electric Guitars » Electric Guitars' and 'Fender'.
- Listing Page Content**: A section with a right arrow.
- Listing Page Options**: A section with a right arrow.
- Search Engine Optimization (SEO)**: A section with a right arrow.
- Additional Attributes**: A section with a right arrow.

At the bottom of the form is a 'Save' button.
