

How do I set the response status code?

There may be situations where the HTTP response status needs to be altered. By default, the returned status is `200`, however, this can be changed by passing the new status code to the `setStatus()` method:

```
\Aero\Store\Http\Responses\ProductPage::extend(function
(\Aero\Store\Http\Responses\ProductPage $page, \Closure $next) {
    $page->setStatus(403);

    return $next($page);
});
```
