

# What versions of Elasticsearch does Aero support?

Aero supports both Elasticsearch `6.x`, `7.x` & `8.x`.

Support for Elasticsearch `6.x` is provided by the `0.x` version of `aerocommerce/elastic-search`.

Support for Elasticsearch `7.x` & `8.x` is provided by the `1.x` version of `aerocommerce/elastic-search`.

It is highly recommended to use at minimum `7.x`.
